

Q2Learning and National Technical Information Services (NTIS) Offer Government Agencies a Unique Service

Falls Church, VA (April 2006) -- Q2Learning, LLC, the leading provider of enterprise software for collaborative learning and knowledge sharing, today announced today a joint venture agreement with the National Technical Information Service (NTIS) to offer hosted e-learning and knowledge management solutions to government agencies. NTIS and Q2 will pool resources to create an infrastructure at NTIS for secure hosting of the xPERT eCampus application alone or in conjunction with Q2 consortium software and services.

The joint venture between NTIS and Q2 will also enable government agencies to have access to a wide range of state-of-the-art e-training software and services offered by Q2's own consortium members (Allen Interactions, Inc, Altus, Assima Ltd, ContextWare Inc, Group Mind Express, Inc, and Knowledge Advisors, Inc.) Specifically, this partnership will give government agencies access to Q2's xPERT eCampus software, winner of the 2004 Brandon Hall award for innovative technology, and the xPERT eCommunity – a robust collaboration platform that combines knowledge sharing capabilities with rich threaded-discussions.

“The combination of Q2's capabilities and our relationships with other learning providers gives us a very exciting opportunity to add value to government e-learning initiatives,” said John Darling, manager of strategic relationships. “We are very pleased that NTIS has chosen to partner with Q2 to complement their capabilities in delivering a wide range of e-learning services.”

As part of the agreement, NTIS will provide the secure infrastructure to host the eCampus or other consortium member software, thus freeing Q2 to focus on world-class service delivery.

About Q2Learning, LLC

Q2Learning is a premier provider of collaboration software for learning and knowledge management. The company's xPERT eCampus, winner of the 2004 gold Brandon Hall award for innovative technology, offers the ability to drive mastery learning by rapidly developing blended learning programs that weave electronic content, web meetings, practice assignments and coached OJT into integrated programs of study. The company's eCommunity enables the rapid creation of communities of practice, action learning programs, and cross-functional project teams.

About NTIS

The National Technical Information Service serves our nation as the largest central resource for government-funded scientific, technical, engineering, and business related information available today. For 60 years NTIS has assured businesses, universities, and the public timely access to well over 3 million publications covering over 350 subject areas. Its mission supports the nation's economic growth by providing access to information that stimulates innovation and discovery.

NTIS offers a wide range of information services to Federal agencies and in 2004 was authorized by the Office of Personnel Management to offer e-Training and Knowledge Management solutions.
