

Wentworth Recruiting Experiences eCommunity Success

Falls Church VA, (November 2005) – Wentworth Recruiting is using Q2Learning's xPERT eCommunity™ platform to drive needed information to team members on everything from administrative procedures to recruiting best practices.

"As soon as we see something that needs to go on our Wentworth online team space, we can put it up in just a matter of minutes. The Q2 tools are very powerful and the interface to them is great," said John Wentworth, principal and founder.

With the recent release of eCommunity 4.1 and a new resource library, Wentworth now enjoys the same robust level of flexibility and control over documents that they have with Q2's full-featured, asynchronous collaboration engine. The ability to set permissions to library resources, a subscription feature that notifies users of updated content and a full-text search feature makes Wentworth's eCommunity an even more powerful tool.

About Wentworth Recruiting

Wentworth Recruiting offers reliable recruiting expertise. With 97% of their assignments concluded successfully, they know specifically where and how to find the best candidates, job by job.

Wentworth's proprietary search management software applies predictive analysis to every facet of your search, including selection. Wentworth's consultants still apply their excellent judgment to their work, but management of the work is done with science, not guesswork.

About Q2Learning, LLC

Q2Learning is the leading provider of enterprise software for collaborative learning and knowledge management. The company's xPERT eCampus, winner of the 2004 gold Brandon Hall award for innovative technology, offers the ability to drive mastery learning by rapidly developing blended learning programs that weave electronic content, web meetings, practice assignments and coached OJT into integrated programs of study. The company's other products include the xPERT eCommunity, enabling the rapid creation of communities of practice, and the xPERT eReference for performance support and workflow learning.
